Physician real time interaction?

Dear Konstantinos,

We would like to invite you to participate in this webcast on the use of oral lopamidol in multidetector computed tomography (MDCT).

This on-demand activity, the second in a [two-part series](#), features a presentation that discusses the benefits and limitations of oral lopamidol vs. intravenous contrast in patients undergoing MDCT.

Oral Lopamidol in Multidetector Computed Tomography

CRITICAL LIMB ISCHAEMIA TREATMENT STRATEGIES
Wednesday, December 9, 18:00 (CET)

Don't miss the next CIRSE webinar – Treatment strategies for CLI patients!

Be sure to tune in on December 9 for this unique online event on critical limb ischaemia, examining minimally invasive treatment options that can help heal damaged tissue, avoid limb loss and improve quality of life for patients impacted by this potentially devastating condition.

Conclusions

- The COVID 19 pandemic changed the world of medical education
- E-Learning boom
- Limitations in physician's interaction
- Development of 'off-the-self' digital solutions
- Potential numerous applications in vascular medicine

Thank you for
your attention
